Subject index

Volume 3

***Acacia*,**
proteinaceous gums, characterization 57
***Acacia paolii*,**
characterization, comparison, commercial *Acacia* gums 475
***Acacia senegal*,**
gum arabic, fractionation, characterization 65
Alcohol,
-containing emulsions, cream liqueurs, neck plug formation 85
Amylose,
aqueous solutions, conformation, physical properties 313
***Astragalus* spp.,**
four species, gum tragacanth chemical composition, USA 217

Benzidine,
-horseradish peroxidase staining, laser densitometry, food gums, polyamide strips 33
Bovine milk,
pasteurized, soy milk detection in 399

Cakes,
acceptability, guar incorporation, different levels 1
Calcium caseinates,
properties, cheese, imitation 19
Carob,
seeds, germ meal chemical composition 149
κ-Carrageenan,
−locust bean gum, mixed gels, added sucrose, mechanical properties 209
−locust bean gum−guar gum mixed gels, compression resistance, influence of composition 457
Cheese, imitation,
calcium caseinates, properties 19
Computer simulation,
food colloid science 345
Cooking properties,
food hydrocolloids 275
Corn grain,
extrusion-cooked, viscosity, expansion 423
Cream liqueurs,
alcohol-containing emulsions, neck plug formation 85

Egg white,
foaming properties, effects of milk proteins 163
Egg white protein,
starch, mixed gel, structure, properties 7

Expansion,
extrusion-cooked corn grain 423

Flocculation,
bridging, protein-stabilized emulsions 389
Food colloid science,
computer simulation 345
Food hydrocolloids,
cooking properties 275

Galactomannan,
food-grade, analysis 413
Gelation,
mechanism, percolation 263
Gellan gum,
food gels, analysis 407
quantitative determination, food products 435
Globulin,
11S, trypsinolysis products, comparison 465
Glycinin,
gel, structure 327
Guar,
−κ-carrageenan−locust bean gum mixed gels, compression resistance, influence of composition 457
incorporation, different levels, acceptability, cakes 1
seeds, germ meal chemical composition 149
Gum arabic,
film formation, emulsion stabilization, flocullation, effects of dilution 101
fractionation, characterization, *Acacia senegal* 65
Gum tragacanth,
Astragalus spp., four species, chemical composition, USA 217

Horseradish peroxidase,
-benzidine staining, laser densitometry, food gums, polyamide strips 33

Ice cream,
firmness, effect of lactose/sucrose hydrolysis 379
Ice cream cones,
textural characteristics 41

α-Lactalbumin,
β-lactoglobulin, competitive adsorption, oil-in-water emulsions 193
β-Lactoglobulin,
α-lactalbumin, competitive adsorption, oil-in-water emulsions 193

Lactose,
effect of hydrolysis, ice cream firmness 379
Laser densitometry,
horseradish peroxidase-benzidine staining, food gums, polyamide strips 33
Locust bean gum,
—κ-carrageenan—guar gum mixed gels, compression resistance, influence of composition 457
—κ-carrageenan, mixed gels, added sucrose, mechanical properties 209

Macroemulsions,
preparation, stabilization, small-molecule surfactants 249
Mesquite gums,
non-food-additive, characterization, *Prosopis* spp. 235
Milk proteins,
effects of, egg white foaming properties 163
Molecular conformation,
relationship—surface tension properties, xanthan 365

Neck plug,
formation, alcohol-containing emulsions, cream liqueurs 85

Oil-in-water emulsions,
α-lactalbumin/β-lactoglobulin competitive adsorption 193
Ovalbumin,
gel, structure 327
linear polymers, characterization 135
thermal denaturation, linear aggregate formation 123

Pectin,
analysis, high-performance ion exchange chromatography 115
dispersed, volume measurements 205
low-methoxy, influence of, protein-stabilized emulsions 225
Pectinate,
soybean globulin, thermodynamic incompatibility, aqueous solution 447
Perceived texture,
thickened systems, characterization 175
Plant seeds,
transparent protein gels preparation 491
Polyamide strips,
horseradish peroxidase-benzidine staining, laser densitometry, food gums 33
Polyelectrolytes,
concentrated solutions, saccharides, mesomorphic properties 301
Polysaccharides,
hydration/structure/function relationships 289
***Prosopis* spp.,**
non-food-additive mesquite gums, characterization 235
Protein gels,
transparent, preparation, plant seeds 491
Protein-stabilized emulsions,
bridging flocculation 389
influence of low-methoxy pectin/xanthan 225
Proteinaceous gums,
characterization, *Acacia* 57
Proteins,
hydration/structure/function relationships 289

Saccharides,
polyelectrolytes, concentrated solutions, mesomorphic properties 301
Skimmed bovine milk,
detection of soy milk, mixtures 485
Small-molecule surfactants,
macroemulsions stabilization, preparation 249
Soy milk,
detection in pasteurized bovine milk 399
detection of, skimmed bovine milk mixtures 485
Soybean globulin,
pectinate, thermodynamic incompatibility, aqueous solution 447
Starch,
egg white protein, mixed gel, structure, properties 7
Sucrose,
κ-carrageenan—locust bean gum mixed gels, mechanical properties 209
effect of hydrolysis, ice cream firmness 379
Surface tension properties,
relationship—molecular conformation, xanthan 365

Tara,
seeds, germ meal chemical composition 149
Trypsinolysis,
products, comparison, 11S globulin 405

USA,
Astragalus spp., four species, gum tragacanth chemical composition 217

Viscosity,
extrusion-cooked corn grain 423

Xanthan,
influence of, protein-stabilized emulsions 225
molecular conformation, surface tension properties, relationship 365
